Hello John,

I denied your application for GMDCPPFCS001 because you missed one place where the emission family name needs to be updated. Page 28 of 47, where you have the emission label, still lists the incorrect family name. Everything else in the application is in order.

Please submit a corrected document and another request for certificate.

Hello John,

I am in San Antonio on business travel this week. Can we talk about the fuel tests you did earlier this year sometime next week when I'm back in the office?

Hi Julia

good morning

Andy will upload test reports and new labels w the correct EPA naming convention today

I do have several questions about our current spout and the fuel tests we did earlier this year ??

Regards John Evans

Hello John,

I looked over your PFC application and have the following comments:

- 1) EPA issued a guidance document on Aug 31, 2015 that clarified family naming convention. I attached it for your reference. Page 5 indicates the emission family characters 6-9 should be PFCs. As such, the emission family name should be GMDCPPFCSXXX where XXX are characters of the manufacturer's choosing. This would involve changing your PFC labels accordingly.
- 2) Can you please upload into Verify the tech's comments from your SGS report? I'd like to see them.

Below is a note I sent to Andy Meloeny on this topic immediately after the guidance document was issued.

Hi Andy,

Please note that a 2016 Portable Fuel Container emission family name will be GXXXPPFCSAAA, where XXX is the manufacturer code and AAA are characters of the manufacturer's choosing. This is a bit different from what the PFC manufacturers have done in the past, so please make sure they know the naming convention and corresponding labels on their PFCs will have to change.

Thank you!

EPA issued the following guidance letter on August 31, 2015:

CD-15-19 (All Industries)

Subject: Consolidation of EPA Standardized Naming Conventions for Engine Family, Test Group, Evaporative/Refueling Family, Permeation Family, Emission Family, and Durability Group

This letter can be found at: http://iaspub.epa.gov/otaqpub/display_file.jsp?docid=35122&flag=1
